

K-Parent Connect

The South-Western City School District is excited to provide families of children entering kindergarten with parent assistance and kindergarten readiness skills for students.

Incoming kindergarten students will be engaged in a three-week summer program to help with listening/motor skills, reading skills, writing skills, and social/emotional development.

.Parents will also be engaged in an adult program titled Parent University. Sessions will assist parents with their child's development and connect parents with other resources to positively impact their child(ren)'s kindergarten experience.

Parents are required to attend a Beginning Literacy and Beginning Math session during the three-week summer program
